Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Imagine my horror when I saw that I had somehow forwarded that e-mail to the list.

Please accept my apologies. Looks like I need to pay more attention when sending mail.
