Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

I've gone back to review my posts in the archive, now that Ranjit has made this easier, and I'm mortified at my bizarre lack of word-wrap for several months. I've no idea what I did to cause this, and I apologize for the nuisance to future diggers in the archives.
