

urth list technical stuff

The Urth list — 1 messages, 1 voices, 31 Jan 2002

<https://urth.darkrealm.vip/thread/urth/2899>

Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Ranjit Bhatnagar — 31 Jan 2002, 02:11

As many of you have remarked, the new Urth list's digest format appears as a series of attachments rather than a single long message. Depending on your mail software, this may be a particularly inconvenient or just an ugly way to read the digest. I'm stuck with the mailing list software that's available to me, but I'll see if there's a way to fix the digests. Please put up with it for now, or switch to individual messages, and maybe a solution will present itself.

As for the archives, they should be available and current again within a few weeks.

To keep the list discussion focused on matters Lupine, please send administrative and technical comments and questions directly to me at [ranjit at urth.net](mailto:ranjit@urth.net).
