Hello everyone,

I've been lurking (or shall I say, silently receiving) for a while and have greatly benefitted from the insight and erudition so generously given by everyone who has posted. One question, though:

Mention has been made several times of Clute's essays. Unfortunately, John Clute's book is impossible to find/order and my library system doesn't have a copy. Would anyone mind boiling down his arguments into an easily digestible form? I think most of his work on this subject has to do with Severain's geneology, but as far as I know it might extend into other areas as well.

Thanks,

ori
