Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Has anyone else finished this? Would anyone care to discuss it, either here or elsewhere? (I'm a member of the johncrowleyreaders Yahoo group, but it's small and doesn't seem to foster sustained discussions, for some reason.) I have something to start with, but I don't want to post it here if nobody wants to see it.
