Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

What happened to the list website at moonmilk.volcano.org? I got an email from someone who tried to access it and got an error message, so I tried it myself and the same thing happened.
