To quote the great Nigel Tufnel, "it's like, how much more black can it be? And the answer is none, none more black."

Jokes aside, you just know these scientists are sci-fi readers, it would be a great nod if they called this new substance fuligin!

Fuligin is already the color of lamp-black.

Interestingly, if you read this article, lamp-black is so black for the same reason this new stuff is.

Absolutely Josh!
from Latin, fuliginosus, full of soot.
