I have just learned that Robert Borski has a new book out. The title is The LONG and the SHORT of IT, subtitled "More Essays On The Fiction Of Gene Wolfe". It is published by iUniverse, who also brought out Solar Labyrinth. I am told by the author (and only after I asked!) that it is currently listed at both Barnes and Noble and Amazon.

I haven't yet seen the actual book (just an e-text version), and I learned of the book's existence only yesterday, so I haven't read it. Portions of it have appeared in the New York Review of Science Fiction, on Michael Andre-Driussi's siriusfiction.com web site and scattered postings made to the Urth List. The book is dedicated to the members of this list.
