

I finally fixed the homepage

Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Apologies to everyone who pointed out the broken links on the urth.net homepage -- and even told me how to fix them -- over the last few months. I was overwhelmed by work, but I finally leaped into action and fixed the links. You can now click to the archives and the subscription form from the homepage again.
