Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Re: Ultan's Library updates.

Hmm. I've been in Paris for a long weekend, or I'd have done it before now, but the "featured story" box at the top of our page is designed for the latest item, but it has to be updated manually if the latest item isn't in the "articles" category.

Until recently we haven't updated the site enough to warrant a "What's New" section, so I'll put it on the "to do" list but there are still many other aspects of our migration to wordpress that I'd like to tackle first.
