The Book of the New Sun is being featured on a poll for "What book series should be adapted into a video game"... Now I don't care if you don't want a video game, but at least get it noticed over *gasp* Harry Potter of all things. The poll is on the bottom right of the page. Thanks.

I'm sorry, I had to go with Elric. I would rather fight with Stormbringer than Terminus Est.

By the way, the BOTNS audiobooks on Audible are very well done. John Davis' reading of Severian so far is very close to how I "read" them silently to myself. I'm midway into Claw and looking for excuses to listen outside of my commute.

is there enough action in this book to justify that.
the Dr. Talos's Play would be a tough level I suppose.

anyone check out the Dante's Inferno game? I played the demo for a few minutes. fun, but it's just a God of War rip off.
