Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Please pardon this test message. I've sent four messages to the mailing list and none have appeared. I am trying a different computer.

When this happens to me, it is invariably that I have inadvertently sent the posting using the
wrong email account.
