Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Tim O'Donnell — 26 Jul 2010, 19:34

This has been going on for weeks now, can we go back to talking about Wolfe?

brunians at brunians.org — 26 Jul 2010, 20:44 · in reply to Tim O'Donnell

No one's stopping you.

Only the parallel Worlds close to this one resemble this one.

Let go of your penis.

<http://www.newscientist.com/article/mg20727703.000-every-black-hole-may-hold-a-hidden-universe.html>

A theory that the Big Bang occurred -- and our universe exists -- within a black hole. I don't think it maps precisely to the cosmology of either the Sun Cycle or the Wizard Knight, but it has resonances for each. Also, if you think of our universe --inside a black hole-- containing black holes that presumably have their own universes, it's kinda gnostic.

Each black hole contains a World.

It is not known if these are identical with the parallel Worlds.

Probably.

The Mormons have knowledge.

The problem is most people don't actually believe their religion.

What is believe?

.

Thanks, but I prefer just to read, the insights and level of educated discussion being beyond my depths. I admit to being baffled by a lot of what Wolfe writes, and am thankful - as a rule - for the explications on view here. I've read him since the late 70s. The Mormon thing is a sore spot

for me, a button if you will; I generally don't care to follow the analysis that teeters towards theology....but by all means, carry on.

Steve
