Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

Don't know if folks have seen this review from Feb 24th, but it seems good and balanced to me and is followed by some interesting discussion in the comments.
