Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

FYI: Michael Thayer is a known Urth member. Likely some application exposed his address book to malware, which is spoofing his email address.

For that reason, I'm not adding the email to the spam filter. If it keeps happening, we can try to reject the spam on some other basis.

OT:

Ranjit, if you're paying attention, I lost the auth info for matthew at urth.net some time ago.
