Here is a profile of Wolfe in The New Yorker ...

geez, it says he wrote over "fifty" stories ... looks like my work on the short stories has been done for like two years ... try 220+

Nice to see literary things running with him. I pray he is revered in the years to come.

I intend on exalting him every chance I get

But monolatrically, not monotheistically, right? I mean, "hold no other gods before" him all you want, but there are still other Gods.

We may have to start a cult.

Once again, we can't tell where the critic's personal opinion of genre ends and the alleged
opinion of a supposed "society at large" (or perhaps merely a profession or industry) begins:

"His books contain all of the nasty genre tropes...."

Sure thing ... it seems as though it has generated a lot of social media activity for Wolfe, which
is awesome ... I am actually surprised how much word in the right place can sway public
opinion. "Twitter alone shows hundreds of gene wolfe mentions in the last two days, compared
to hundreds in months or years before that..."
