Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

I need someone to take care of the Urth and Whorl mailing lists while I'm on vacation for two weeks. The only real responsibility is to unsubscribe anyone who accidentally floods the mailing list due to misconfigured email software. Any volunteers?

Also, I have just about one megabyte left in my web account. You folks have been writing at the rate of about a third of a megabyte every week lately, so things should be ok while I'm away. Just don't let the arguments get too heated, or the web archives will fill up before I get back.
