Mantis,

You wrote:

Easy now. You've confused Moly and Maggie! (See lists, IV.) The handy mnemonic is to remember that "Moly" is the magic herb (sweetheart of Hammerstone), Maggie is the metal.

I'm new to the mailing list, so ignore this is someone has already pointed it out. Moly may be a magic herb, but it's the diminutive of Molybdenum which is also a (transition) metal, no. 42 in periodic table, and thus a suitable chem name.
