Exported from an unofficial mirror of a public mailing list. Copyright in each message remains with the person who wrote it. Email addresses are obscured as `user at host`, the form the original archive published. This file was rebuilt from parsed fields rather than retained headers, so it is faithful in content but not byte-exact.

I'd like to apologize for inadvertently spamming the list last Thursday with multiple replies. My autoreply function went into a loop with the listserver for about 12 hours. Ranjit unsubscribed me from the list at about the same time I realized there was a problem and turned off the autoreply.

Sorry for the inconvenience. Please ignore all those replies.
